

EUROSAI

Working Group on
Environmental Auditing

The way forward for environmental auditing?

Aim with the seminar

Knowledge sharing and awareness raising

- Overview of relevant information for and expectations to environmental auditing
- Share ideas and issues on approaches related to evidence and criteria
- Share experiences and discuss what is best/good practice
- Awareness raising related to ISSAIs

SAIs' responsibility and role

- National, public and independent actor
- Key institution for assessing national and international environmental policy implementation
- Access to information and possibility for detail assessments

What can a common ISSAI- framework give us?

- Better quality and conformity
- Credibility
- Common auditing platform and audit language
- More international cooperation?
- New tasks and roles – internationally?

INCREASED IMPACT?

Expectations to Environmental auditing

- to increase awareness of the importance of environmental auditing among key international organisations and build working relationships with them
- implementation of commitments made by governments in multilateral environmental agreements
- coordinated audits between SAIs relevant to environmental and sustainable development issues

Future for environmental auditing

- Environmental agreements/directives
- International funding on climate
- Public sustainability performance

What to bring home?

<http://www.youtube.com/watch?v=Wf5Jn8O3s0c>

Discussion topics

1. What will you share from this seminar with your colleagues back home?
2. Have you learned anything today that you can practice in your next audit?
